

2014

FLORIDA YOUTH

SUBSTANCE ABUSE SURVEY

Miami-Dade County

Methodology

- Survey administration: February of 2014.
- Sampling strategy: schools and classrooms were selected to generate statistically representative county-level estimates.
- Final sample size was 1,755 across grades 6 through 12.
- The margin of error is less than 4.6 percentage points for M.S. prevalence rates and 4.7 percentage points for H.S. prevalence rates.

Lifetime and Past-30-Day ATOD Prevalence Rates

2014 Results

* High School Only

**Graph
2**

Past-30-day use of alcohol, tobacco and other drugs among Miami-Dade County students, 2014

Key Findings

- With overall prevalence rates of 43.0% for lifetime use and 22.1% for past-30-day use, alcohol is the most commonly used drug among Miami-Dade County students.
- After alcohol, students reported marijuana (19.9% lifetime and 10.6% past-30-day) and cigarettes (13.8% lifetime and 2.8% past-30-day) as the most commonly used drugs.
- 17.5% of high school students reported blacking out after drinking on one or more occasions.
- For other ATOD categories, past-30-day prevalence ranges from 2.3% for inhalants to 0.1% for steroids.

**Graph
25**

School domain and peer and individual domain risk factor prevalence rates for Miami-Dade County and Florida Statewide **middle school** students, 2014

**Graph
26**

Protective factor prevalence rates for Miami-Dade County and Florida Statewide high school students, 2014

**Graph
27**

Community domain and family domain risk factor prevalence rates for Miami-Dade County and Florida Statewide high school students, 2014

**Graph
28**

School domain and peer and individual domain risk factor prevalence rates for Miami-Dade County and Florida Statewide **high school** students, 2014

Key Findings

- Protective factor prevalence rates—opportunities for improvement:
 - Middle school students reported the lowest rates of protection for the *Religiosity* (40%), *Community Rewards for Prosocial Involvement* (45%) and *School Opportunities for Prosocial Involvement* (48%) scales.
 - High school students reported the lowest rates of protection for the *Community Rewards for Prosocial Involvement* (57%) and *Religiosity* (51%) scales.

Key Findings

- Risk factor prevalence rates—opportunities for improvement:
 - Middle school students reported the highest rates of risk for the *Transitions and Mobility* (54%) and *Lack of Commitment to School* (52%) scales.
 - High school students reported the highest rates of risk for the *Transitions and Mobility* (60%), *Lack of Commitment to School* (50%) and *Poor Academic Performance* (50%) scales.
